

Requirements for images to be uploaded to Schoolcomms eCards

- an 800x800 pixel image
- remember that the image must have spaces for the configurable text, though it can also include embedded text.
- a list of all the customisable text on it (as described below)

Text description/tag (4)	Default text (5)	Location X and Y coordinates (1)	Width (2)	Height (2)	Font and size (3) (7)	Default styles (I, B, U) (6)	Default colour (8)	Other effects (Rotation, Skewing, Warping, etc.) NB. Please describe this clearly (3)

Alternatively a multi-layered (one layer per text entry) picture (created using a program such as Photoshop or the GIMP) can be sent to us. However before going for this option make sure that we have a full license for the application in question or that there is a freely available application that we can use to look at the eCard – we recommend to use a format which is compatible with 'The Gimp' - <http://www.gimp.org/>

NB. The fonts that can be used on eCards are: "Arial", "Arial Black", "Arial Unicode MS", "Calibri", "Cambria", "Cambria Math", "Comic Sans MS", "Candara", "Consolas", "Constantia", "Corbel", "Courier New", "Georgia", "Lucida Grande/Lucida Sans Unicode", "Segoe UI", "Symbol", "Tahoma", "Times New Roman", "Trebuchet MS", "Verdana", "Wingdings", "Wingdings 2", "Wingdings 3"

Please feel free to get in touch with us if you would like to discuss the requirements.
